

Jan Koriták

Senior Full-Stack Engineer · Partner at servio.com

SUMMARY

Senior full-stack engineer, partner at servio.com, full-time IC.

React/TypeScript core, Python/Django preferred, with growing depth in production LLM systems — agent architecture, eval harnesses, voice.

Shipped across 5 industries: media intelligence, enterprise observability, cycling hardware, aviation training, voice AI.

EXPERIENCE

2026 EU **Elearn.Aero v2 — Tech Lead**

Aviation training platform, greenfield rebuild — owned end-to-end including production tenant migration from v1. Designed tenant-isolated architecture via PostgreSQL row-level security and contract-first APIs across React web, Expo mobile, and Django backend. Custom Claude Code skills tuned to the stack; five engineers shipping at the velocity of more.

2025 EU **Wave — Founding Engineer**

Voice agent SaaS for B2B hospitality — owned greenfield to production. Next.js dashboard, Python FastAPI voice agent on Deepgram + GPT-5, Expo mobile, Supabase + Stripe. Recovered intent accuracy and cut end-to-end latency from 5.2s to 1.2s over a weekend via an eval harness and Karpathy's autoresearch loop with Claude Code.

2021–2025 · 4Y US / CZ **SolarWinds — Senior Frontend Engineer**

Four years across Alerting, Dashboard/Platform, and DBO teams (former VividCortex). Co-authored the Alerting module and the platform-level configurable dashboards framework reused across every product module. Stepped off in 2025 to commit fully to AI product work.

Dec 2023 *Acquired equity in servio.com. Staying hands-on technical.*

2022 CZ **hire.dev — Co-founder**

Hiring platform matching engineers with companies by open-source contribution scoring. Shipped, onboarded first users, never found PMF. Folded.

2018–2021 · 3Y US **Hazelcast — Senior Frontend Engineer**

jQuery typed React migration of the IMDG management portal — incremental rewrite, TDD, module-by-module, zero production disruption across a customer base of banks and telcos. Co-authored Hive, Hazelcast's open-source design system.

2020 CZ **License.sh — Co-founder**

License-scanning SaaS — open-source scanner for npm, pip, Maven dependencies plus a SaaS on top. Couldn't raise when COVID hit. Folded.

2020 CH **Magnes — Tech Lead**

Real-time cycling performance tracker — native mobile app with BLE hardware integration for Swiss cycling electronics maker. Early React Native + BLE when neither was stable. Designed the stack, shipped greenfield with a small team.

2017–2018 NO / DK **Infomedia — Frontend Engineer**

Frontend of the alerting module at a Nordic media intelligence platform — real-time brand and topic alerts to PR and communications teams.

2016–2017 CZ **Kiwi.com — Frontend Engineer**

Seat-selection module for one of Europe's largest online travel agencies. Cabin layouts rendered as SVG per aircraft, seat-level pricing, integrated into the existing checkout.

2016 CZ **GoodEvent — Full-Stack Engineer**

Event platform — full-stack features across web and React Native mobile, team of two, Firebase data layer.

SKILLS

Frontend React · TypeScript · Next.js · Tailwind CSS

Backend & Data Python · Django · PostgreSQL · Supabase · Firebase · GraphQL

Mobile React Native · Expo

AI & Tooling Claude Code · Voice AI & Agents · LLM Evals

Leadership Tech Lead · Founder

EDUCATION

2016 **Master of Engineering in Informatics**

Brno University of Technology.

WRITING & SPEAKING

Apr 2026 **Fixing a voice agent using Karpathy's autoresearch blueprint**

Recovering a production voice agent with an eval harness and an autonomous Claude Code loop. 27-min deep dive at blog.jankoritak.com.

2023 **Server Components vs. SSR in Next.js — 215k readers**

Comparison of RSC with SSR/SSG/ISR. Featured in This Week In React by Sebastien Lorber.

Feb 2023 **Next.js Meetup — Server Components**

Co-hosted SolarWinds + servio meetup in Brno. Presented React Server Components shortly after their release.

OPEN SOURCE

Storybook **Story indexer path-handling fix**

Merged PR fixing a path bug in the indexer (87K).

Hazelcast Hive **Co-author, accessible design system**

Open-sourced design system behind Hazelcast Management Center. 20 merged PRs across accessible components.
